SAFIR surgical instruments

SAFIR SURGICAL INSTRUMENTS was founded in the first half of 2015 for manufacturing Surgical Instruments. Safir Surgical Instruments aims to provide quality, ergonomics, and surgery comfort to the users by processing raw materials of German origin with its high technology machinery.

The professional staff of Safir Surgical Instruments have the capacity to manufacture approximately 18,000 different products in the fields of human and veterinary surgery.

Safir Surgical Instruments provides continuous post sale support to its users through its expert personnel.

Safir Surgical Instruments also performs maintenance and repairs of surgical instruments of different brands used in hospitals or practices in order to contribute to the user's and also the country's economy.

safir[®] surgical instruments

Safir Surgical Instruments has also developed a QR Code Based Sterilization Tracking System in Akdeniz University Technopolis campus. All manufactured products are QR coded through a Fiber Laser machine to make them convenient for this tracking system without any additional charge and offered for sale.

Travmavet offers premium products and services to veterinarians who seek more successful and up-to-date solutions with quality orthopaedic implants and equipment, to those who choose us over other existing alternatives for our innovative and proven designs that we produce from quality titanium raw materials and those who value their profession and patients

Basic Orthopedic Set
